

McDonald's on Paradise Ave, Las Vegas, NV was installed at the last of May 2006. Below are the first three months of the savings as recorded from their Utility bills. During the last three months of the year, their bill had gradually gone down and then increased. Rodney and Chris went to investigate and found a HAVC unit that had lost all Freon from a break in the tubing. After taking that unit off line, replacing some units with the new Gesper Booster, the bills have averaged a 25% savings.

Below is the actual bill summary for the first three months with the previous Circuit Rider product installed.

McDonald's (on Paradise)						Ave Cost per KWH Used		
Month	KWH Used	Days	Usage/Day	Dollar Cost				
Dec-04	41,840	34	1,231	x		\$3,776	Using 41,840 x .0902
