To whom it might concern;

Bison Gear & Engineering Corporation has worked with Greenworks Energy Solutions to reduce our energy usage. Josh Novak and his crew were of great assistance in performing an energy usage audit, return on investment analysis, technical recommendations and installation of the equipment.

In our case, we had a goal of reducing total energy consumption by 25% and, after installation of lighting and the Gesper units, we are actually projecting savings of 30% with a payback on capital investment of slightly less than two years.

Our experience with Greenworks was highly satisfactory and we would recommend them for your consideration.

A handwritten signature in cursive script that reads "James R. Winters".
