Brian Acuff,
Pyramid Energy Resources
300 Peach Ln.
Tolar, TX 76476

Dear Mr. Acuff,

Thank you for working with us in installing GESPERS at our dairy, we're very satisfied at the energy savings, as well as the other benefits you described.

We're saving 18% on our energy costs exceeding the 10% guarantee, so we're grateful that GESPERS are helping us cut costs allowing a rapid return on investment. We highly recommend your company's solution as a way to help weather these tough economic times, and see now how valuable this product is to our daily, dairy operations.

We also appreciate your diligent work discovering power quality problems that we were unaware of, that was wasting electricity, and also causing harm to our animals. Your comprehensive site survey found a bad transformer on our utility pole, delivering very poor power quality on one leg or phase of our utility service, which the utility promptly repaired after we notified them.

You also found faulty wiring causing our cows to be shocked as they were entering the milking equipment, which after being repaired, enabled the cows to herd in much more quickly. We believe this discovery will noticeably reduce mastitis on our girls, and improve milk production and quality, as well as, benefit their overall health, reducing the use of medicine on them, and those associated costs.

We could not have anticipated the many benefits your company and your products have assisted us at our dairy, and are glad to have you as a partner in our family business.

Sincerely,

Deb & Pete Oldengarm
