Dear Mike,

I want to thank you guys for doing such a great job on overseeing the installation of the GESPER. In the first month we're already showing a kilowatt reduction well of above the 10% your company guaranteed. I'm excited to see how the system works and what further reductions can be achieved over the coming months. At these savings we should realize our return on investment in 7-8 months

Thanks you for your professionalism and service.

Sincerely,

Dan O'Malley
