

ENERWORKS

Commercial & Residential

SOLAR COLLECTORS

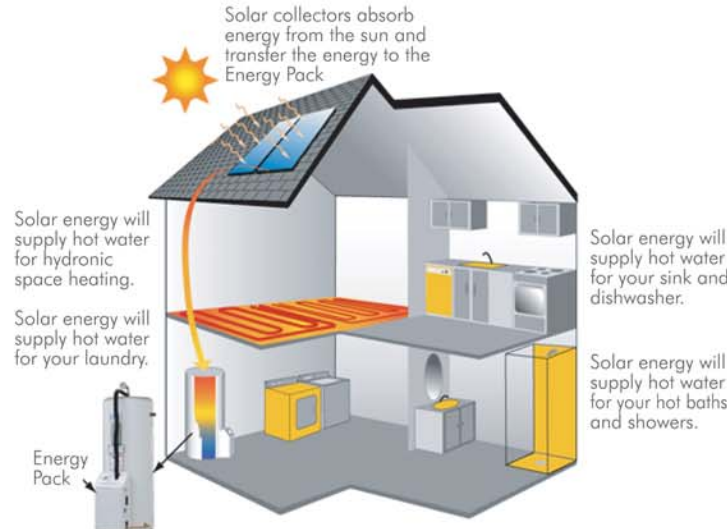

The EnerWorks solar water heating appliance captures the sun's energy to become your primary source for hot water. Your existing electric or natural gas water heater functions as a back-up heating source. You are never without hot water. With increasing energy costs solar water heating is one of the best ways to save on your utility bill.

- #### FEATURES
- Absorbs 94% of the sun's energy
 - Reliable in all climates – patented technology prevents freezing and overheating
 - High performance flat plate collectors
 - Thoroughly tested for leaks, strength, and corrosion resistance
 - Stands up to high and low temperature
 - Clean look when installed
 - Designed for quick installation in groups of up to 10 side by side collectors

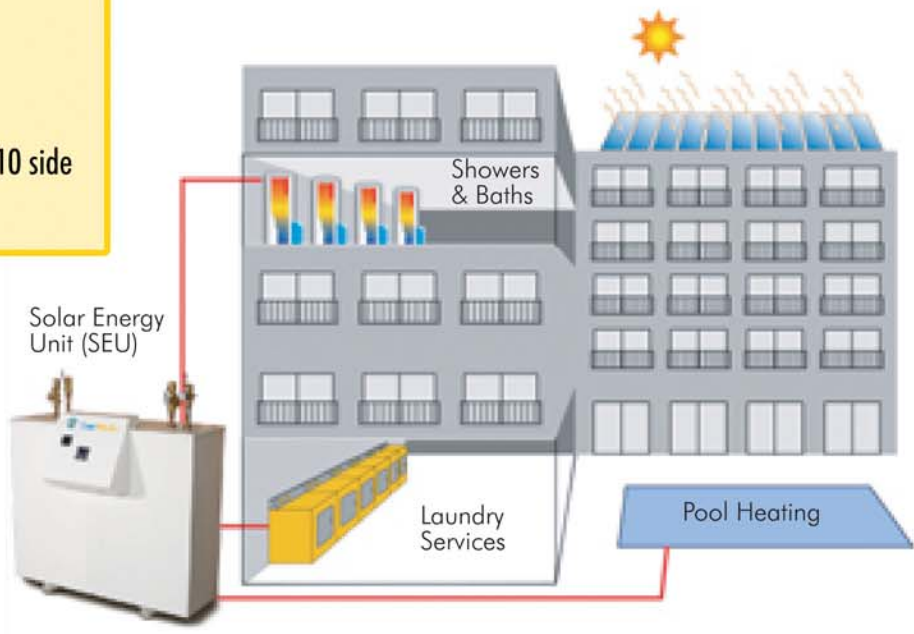

APPLICATIONS

- Hospitals
- Hotels
- Community centers
- Car Washes
- Laundries
- Restaurants
- And Your Home
