Mr. John Novar  
Green-Energy-Products

Dear John:

I just wanted to thank you and the rest of the Green-Energy-Products team for the work that you have done replacing my old fuse box with a safer circuit panel and GESPER.

I am enjoying the tankless water heater because it really generates all the hot water I need and saves me on my electric bill because it is only on when I use the hot water and not all the time like my old hot water tank that ran consistently. The GESPER and the tankless water heater have so far performed as promised with an estimated 20% reduction in my energy bills.

I believe that being environmentally responsible is something that is important for all of us to be. Working with you has been a pleasure, and I appreciate the time and attention to detail you have provided throughout the process.

Sincerely,

Margaret Seroppian
